

Patient information

Finger / Hand Mobilising

Therapies Department

The following exercises are intended to assist with the return of normal finger and hand function.

All exercises should be repeated ten times hourly throughout the day (unless otherwise stated). You should not over force the movements, but work gently in to the end of range. Use the opposite hand to assist movement, trying to move a little further each time.

- Support below the finger joint to be exercised.
- Bend your fingertip.
- Assist the movement with your other hand.

- Support below the finger joint to be exercised.
- Bend the middle joint of the finger.
- Assist the movement with your other hand

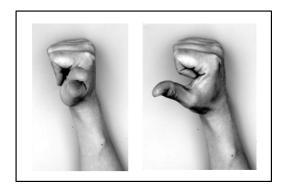

- Sit with your elbow on the table.
- Bend your fingers 90 degrees to the palm and then straighten them.

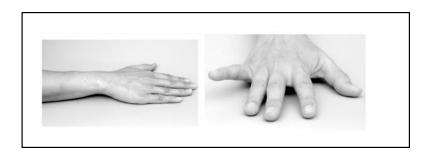

Fingers straight. Fingers hooked.

Forearms supported on a table. Hook your fingers and then make flat fist and then a full fist.

Palm on a table. Lift each finger individually off the table.

Palm on a table. Spread your fingers apart and bring them together

Feedback

Your feedback is important to us and helps us influence care in the future.

Following your discharge from hospital or attendance at your outpatient appointment you will receive a text asking if you would recommend our service to others. Please take the time to text back, you will not be charged for the text and can opt out at any point. Your co-operation is greatly appreciated.
