

Patient information

Ileal Conduitogram

Imaging Department

There is no need for any special preparation before this examination. You should eat and drink normally.

Any alternative treatments or procedures will have been discussed at your initial consultation with your referring practitioner.

What is an ileal conduitogram?

This is an X-ray examination of your ileal conduit using a colourless liquid known as an X-ray contrast agent, or dye. It is carried out by a Radiologist (a doctor who specialises in X-rays) or a specially trained radiographer.

What are the benefits of having an ileal conduitogram?

This procedure will help us make the right diagnosis so we will be able to give you the correct treatment.

The risks of having an ileal conduitogram include:

We are all exposed to natural background radiation every day of our lives. Each X-ray examination gives us a small additional dose. This dose varies with each type of examination. Everything is done within the X-ray department to minimise this dose.

Patients of a Child-bearing Age: X-rays may be harmful to an unborn child, especially in the early stages of pregnancy. If you are pregnant or there is any possibility of you being pregnant, please contact the X-ray department before your appointment.

If you are worried about any of these risks, please speak to your Doctor or a member of their team.

What to bring with you

Please bring a spare stoma bag with you. You may also wish to bring with you a dressing gown, slippers and book.

The examination

- You will be taken to a changing room and asked to undress and put on a gown. When it is your turn, you will be taken to the X-ray room and asked to lie on the X-ray table. A small tube will be put into your stoma.

- The liquid goes through this tube and into your ileal conduit. You will be asked to move onto your side and back so we can take X-ray pictures from different positions.
- This examination takes about 30 minutes.

After the examination

The tube will be removed and you will be able to change your stoma bag. You may continue to eat and drink normally.

Results

The results of your X-ray examination will be sent to the doctor who requested the examination.

Cancellations

If you are unable to keep this appointment, please let us know as soon as possible and we will arrange another for you. If you fail to cancel and do not attend you will be discharged back to the care of the referring clinician.

Transport

If your medical condition or mobility needs mean that you cannot get to your appointment any other way and you require transport you should ring the Patient Transport Services (PTS) who will arrange one for you.

Tel: 0151 706 4676

Car parking

Car parking for visitors and patients is available at the Q-Park multi-storey car park located on Prescot Street, L6 1LY.

For those with walking difficulties, there is a shuttle bus service operating between Q-Park and The Royal Liverpool University Hospital. The bus operates Monday to Friday, 6am-8pm. If you find you are waiting a while for the bus, the driver's number is displayed on the Q-Park exit.

Parking for Blue Badge holders is free at the Mount Vernon Street entrance. However, parking is limited, and you are advised to allow sufficient time for parking as you may need to redirect to the nearby Q-Park.

Please bring this leaflet with you when you attend the X-ray department.

Feedback

Your feedback is important to us and helps us influence care in the future.

Following your discharge from hospital or attendance at your outpatient appointment you will receive a text asking if you would recommend our service to others. Please take the time to text back, you will not be charged for the text and can opt out at any point. Your co-operation is greatly appreciated.

Further information

If you have any further questions, or require further information, please contact the Radiology Appointments Office:
