Patient Reported Outcome Measures (PROMS)

Therapies Speciality

What do the questionnaires look at?

The questionnaires help us to understand your symptoms and the impact they are having on your normal day to day activities and quality of life.

Why am I being asked to fill out the questionnaires?

You will be asked to fill them out on several occasions during the course of your care so we can assess your progress and judge how effective your treatment has been.

There is some repetition, why do I have to fill them all out?

Each tells us slightly different things, using several questionnaires together gives us a better insight into your abilities and problems.

What will be done with my information?

Your results from the questionnaires will be added to our secure computer system where copies of your clinic letters and operation notes are already stored.

Will my results be used for research?

It is essential that the hospital proves it is providing safe and effective care for its patients.

Results will be compared to establish which treatment techniques are the most effective and, by publishing the evidence, future patient care will be improved.

You will not be identifiable from any published data and your personal information will not be passed on to any other agencies.

If you do not wish your data to be included in research please tick the 'no' box at the bottom of the questionnaire.

Feedback

Your feedback is important to us and helps us influence care in the future.

Following your discharge from hospital or attendance at your outpatient appointment you will receive a text asking if you would recommend our service to others. Please take the time to text back, you will not be charged for the text and can opt out at any point. Your co-operation is greatly appreciated.
