

Patient information

Voriconazole 1% eye drops (preservative free)

St Paul's Eye Unit – Ophthalmology

What are voriconazole eye drops used for?

Voriconazole eye drops are used to treat fungal eye infections.

How do I administer my eye drops?

1. Please administer as per the label on the product.
2. Wash your hands before opening the bottle
3. Sit down and tilt your head back
4. Pull lower eyelid down and look up
5. Use other hand to squeeze one drop into lower eyelid making sure the nozzle does not touch your eye, eyelashes or eyelid
6. Close your eye and press gently on the inner corner of the eye for 30-60 seconds to ensure the drop is fully absorbed.
7. Please leave at least a minimum 5 minute between administering other eye drops
8. If both eyes are affected, you will need a separate bottle of eye drops for each eye

How should I store my eye drops?

Voriconazole eye drops should be stored in a fridge between 2°C - 8°C

If your eye drops are stored outside of the fridge, please contact the hospital for further supply

How long will my eye drops last?

Voriconazole eye drops are manufactured aseptically and expire 90 days after manufacture.

Once a bottle of eye drop is opened, the eye drops expire after 24 hours – this means that each day, you will need a new bottle of teicoplanin eye drops, and any used bottles should be discarded.

The expiry date will be written on the eye drop bottle label.

Where can I get supply of my eye drops?

Voriconazole eye drops are only supplied by the hospital.

This is because voriconazole eye drops are an unlicensed medicine manufactured in the hospital aseptic unit.

Because this product has a short shelf life, you may be required to return to the hospital to collect further supply of your eye drops

How can I speak to someone if I have a problem with my medication or need further supply?

The ophthalmology pharmacists are available Monday-Friday 9-5pm if you need to discuss further supply or issues with the medication

They are contactable by email: ahn-tr.uveitis.liverpool@nhs.net

Or by phone: 01517062000 bleep #5141

At the weekend, please contact the hospital dispensary on 0151 706 2092 between 9am and 4pm.

What does it mean if a medicine is unlicensed?

In the UK, medicines are checked to make sure they work and are safe. These checks are normally part of a clinical trial. The

Medicines and Healthcare Products Regulatory Agency (MHRA) gives a product licence to medicines which have passed these checks. The product licence, also called a market authorisation, will say which condition or conditions that medicine can be used to treat. An unlicensed medicine is a medicine which does not have a product licence. A medicine might be unlicensed for various reasons such as:

- Manufacturers may decide not to try to get new uses for a medicine added to the product license because it is very expensive to complete the necessary clinical trials.
- The number of people with a particular condition is too small to allow clinical trials to be completed.
- The medicine is still going through the licensing process, which can take some time.

How do I know these medicines are safe and will work?

Your prescribers will have considered all the options for treating your condition before deciding to give you an unlicensed medicine. The prescriber will have thought carefully about the best medicine for you and your condition. Prescribers have a lot of experience with medicines. They will have read specialist information about the unlicensed medicine and may have talked to other experts about your treatment.

What if I don't want to use an unlicensed medicine?

This is your choice to make. Talk it over with your prescriber. Tell them what you are worried about. They will be able to give you more information and advice about the medicine. Your prescriber will also be able to discuss alternative treatments with you and explain why they think this option is the best for you

Feedback

Your feedback is important to us and helps us influence care in the future.

Following your discharge from hospital or attendance at your outpatient appointment you will receive a text asking if you would recommend our service to others. Please take the time to text back, you will not be charged for the text and can opt out at any point. Your co-operation is greatly appreciated.
