

## Patient information

### What Is Call 4 Concern

#### Critical Care Department

Patient Safety is the priority in the Royal Liverpool Hospital, especially in patients whose health is getting worse. Call4Concern is a Martha's Rule initiative and what we at LUHFT are referring to Martha's Rule. This is a patient safety initiative to detect rapid detection in inpatients. Call 4 Concern© is a patient safety service run by the Critical Care Outreach Team, that allows patients and families to call for rapid help when they are concerned that the health care team has not recognised their own or their loved one's worsening condition.

**Call 4 Concern if you are still worried after you have spoken to the ward nurse or doctor.**

Please do not feel concerned that using this system will negatively affect the patient's care in any way. We recognise that sometimes the patient or a close loved one can see that something is wrong. No one knows your health care needs better than you and your family.

**Call: 0151 706 5811**

#### Responding To Your Call

**When the Critical Care Outreach Team receive your call, they will need to know:**

- about whom is calling?
- about patient and the ward
- what is the problem?

After assessing the urgency of the problem, the team will visit you on the ward to discuss your concerns and assess the situation and start treatment if needed.

The Critical Care Outreach team will talk to the patient's medical team to discuss further treatment options. Sometimes, we are unable to take your call immediately, as we are on another call. Please ring back.

#### Feedback

Your feedback is important to us and helps us influence care in the future.

Following your discharge from hospital or attendance at your outpatient appointment you will receive a text asking if you would recommend our service to others. Please take the time to text back, you will not be charged for the text and can opt out at any point. Your co-operation is greatly appreciated.
